Art Unit: 1649

- 1) Claims 1 to 10 are pending in the instant application.
- 2) Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1 and 2, drawn to an isolated receptor protein, classified in class 530, subclass 350.
- II. Claims 3 to 10, drawn to an isolated antibody that binds to a receptor protein, classified in class 530, subclass 388.22.

The inventions are distinct, each from the other because of the following reasons:

The receptor protein of invention I and the antibody of Invention II are two materially different products each of which can be made and used without the other. These two proteins do not reflect a common inventive concept because they lack a common utility that is based upon a common feature or combination of features that distinguish them as a group from the prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1649

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
